IDENTIFIERS	*Texas

ABSTRACT

This report provides dropout information for Texas schools during the 1995-96 school year. Included in the report are historical dropout information; a summary of dropout rates based on school district characteristics; a listing of dropout rates broken down by county, district, and campus; and national comparative data. The total number of dropouts reported for the 1995-96 school year was 29,207. This represents a 1.8 percent annual dropout rate for the year. The estimated longitudinal dropout rate of 10.1 percent remained fairly constant. An examination of the characteristics of 1995-96 dropouts and their education programs reveal that over 80 percent are overage for grade Males dropped out at slightly higher rates than females, and Hispanics made up the greatest proportion of this year's dropouts. The largest number of dropouts and the largest dropout rate were found at the ninth-grade level. Urban school districts with large student enrollments and other central city districts had the highest dropout rates. Districts with lower student performance on the Texas Assessment of Academic Skills (TAAS) test also reflected higher dropout rates compared to high-performing districts. School districts that maintained above-average operating costs per pupil had lower dropout rates, although the lowest spending districts did not have the highest dropout rates. (Contains over 70 pages of quantitative data and 20 references.) (RJM)

Highlights

How many students drop out?

- 29,207 students in 1995-96
- 1.8 percent annual dropout rate, unchanged from the 1994-95 annual dropout rate
- 10.1 percent longitudinal dropout rate

Who drops out and why?

- 80 percent are overage for grade
- Males drop out more than females
- Hispanics make up the greatest proportion of dropouts, with African Americans a close second
- Reasons cited for leaving include poor attendance, entering non-state-approved GED programs, and pursuing a job

Are they leaving certain districts?

- Largest enrollments - greatest departure
- Lower student performance - higher dropout rate

How do we compare nationally?

- Based on the Current Population Survey, 5.3 percent of students in Grades 10-12 dropped out of school across the nation
- Out of over 15 states meeting requisite Common Core of Data collection standards, Texas ranked below the midpoint on national comparison dropout rates

Report on Texas Public School Dropouts — 1994-95

Executive Summary

The total number of dropouts reported for the 1995-96 school year was 29,207. This represents a 1.8 percent annual dropout rate for the 1995-96 school year, which did not change from the 1994-95 school year. The estimated longitudinal dropout rate of 10.1 percent also remains fairly constant as it is projected over the next six years. One of the objectives of public education is that, through enhanced dropout prevention efforts, all students will remain in school until they obtain a high school diploma (TEC §4.001). The target set in law is to reduce the annual and longitudinal dropout rates to five percent or less by the 1997-98 school year (TEC §39.182).

An examination of the characteristics of 1995-96 dropouts and their education programs reveals that over 80 percent are overage for grade. Males dropped out at slightly higher rates than females, and Hispanics made up the greatest proportion of this year's dropouts. The largest number of dropouts and the largest dropout rate are found at the ninth grade. Less than 40 percent of 1995-96 dropouts was identified as at risk of dropping out of school the year they drop out. Some reasons cited for dropouts leaving school include poor attendance, entering non-state-approved GED programs, and pursuing a job.

Urban school districts with large student enrollments and other central city districts had the highest dropout rates in 1995-96. Districts with lower student performance on the Texas Assessment of Academic Skills (TAAS) test also reflected higher dropout rates than high-performing districts. School districts that maintain above average operating costs per pupil had lower dropout rates, although the lowest spending districts did not have the highest dropout rates.

The national annual rate was an estimated 5.3 percent, representing almost one-half million students. Nationally, as in Texas, the highest dropout rate is among Hispanic students.

To provide a basis for state-by-state comparisons, NCES developed a definition of "dropout" that could be adopted and implemented by all states. Through the Common Core of Data collection, 17 states and the District of Columbia had data that met quality and comparability levels needed to justify publishing state estimates for 1992-93. In 1992-93, using a different definition and less comprehensive methodology than Texas, NCES determined that the Texas annual dropout rate is below the midpoint of all available NCES dropout rates. The Texas rate is significantly lower than California's, a state with similar student demographics.

Preface

This report provides an annual update on dropout information for the 1995-96 school year. Included in the report are historical dropout information, a summary of dropout rates based on school district characteristics, a listing of dropout rates broken down by county, district, and campus, and national comparative data.

Dropout Definition, Data Collection, and Methodology

Dropout information is collected from the school districts after the end of each school year. School districts report the number of dropouts through the Public Education Information Management System (PEIMS); instructions for identification of dropouts are included in the *PEIMS Data Standards* (TEA, 1996b). Dropout information is collected for Grades 7-12. A student is identified as a dropout if the individual is absent without an approved excuse or documented transfer and does not return to school by the fall of the following school year, or if he or she completes the school year but fails to reenroll the following school year.

Students in the following categories are identified as dropouts.

- Students who drop out as defined above
- Students who enter the military before graduation
- Students from special education, ungraded, or alternative education programs who leave school
- Students who leave school and enter a program not qualifying as an elementary/secondary school (e.g., cosmetology school)
- Students enrolled as migrants and whose whereabouts are unknown

Students in the following categories may be reported to PEIMS but are not included in the dropout count.

- Students who die
- Students who drop out as defined above, before the seventh grade
- Students who are out of school for temporary periods with an approved excuse
- Students showing regular attendance at a state-approved alternative program
- Students enrolled as migrants who have a subsequent school enrollment record (i.e., a Migrant Student Record Transfer System Education Record is available)
- Students known to have transferred to another public school, adult or alternative education program, or home schooling
- Students who move to another grade level
- Students who enroll in college early
- Students transferred or assigned to another public institution or state-approved educational program
- Foreign students who return to their home country

In 1990-91, the Texas Education Agency (TEA) began an automated statewide recovery of reported dropouts. The dropout recovery process removes dropouts from the number submitted by school districts if the reported dropouts:

1. have remained enrolled in public school somewhere in the state, according to the school district attendance and enrollment information provided through PEIMS;
2. have received a General Educational Development (GED) certificate and appear on the GED information file at the time the recovery procedures are executed;
3. have graduated within the last year;
4. were expelled for criminal behavior occurring on school property or at school related functions and were incarcerated;
5. were identified as a dropout at any time back to the 1990-91 school year. A student will be counted only once as a dropout in his or her lifetime, even if the student drops out repeatedly in the future. First-time dropout identification applies to dropouts reported since the 1990-91 school year, the first year that student identification data were collected along with the dropout record;
6. met all graduation requirements but did not pass the exit-level Texas Assessment of Academic Skills (TAAS) test; or
7. withdrew to return to their home country.

In 1995-96 the dropout recovery process was expanded to include students who:

8. were attending approved alternative programs; or
9. withdrew to attend college.

In 1995-96 the recovery process identified 15,845 students who were not included in the final dropout count. Table 1 presents the number and percentage of dropouts recovered for each reason.

The current dropout rate is calculated by dividing the number of dropouts by cumulative enrollment in Grades 7-12. Cumulative enrollment is the count of all students reported in attendance during any six-week reporting period. If students enroll on several campuses during a school year, they are counted in attendance at every campus on which they are enrolled. However, when aggregating dropout information, the student is only counted once at the campus, district, county, region, and state level. Cumulative enrollment more closely parallels the number of dropouts counted for that entire school year. Although this rate is less comparable to the dropout rates reported before 1992-93, it provides a more accurate reflection of the dropout situation and more uniform data for comparison between districts and campuses.

Table 1. 1995-96 Recovered Dropouts by Reason

Recovery Reason	Frequency	Percentage
Moved to another district	3,741	23.6%
Received a GED certificate	3,489	22.0%
Dropout in a previous school year	2,183	13.8%
Enrolled into an approved alternative program	2,161	13.6%
Met all graduation requirements but failed Exit TAAS	1,942	12.3%
Returned to home country	1,720	10.9%
Expelled for criminal behavior	416	2.6%
Entered college	80	0.5%
Not ADA eligible	67	0.4%
Graduated	24	0.2%
Duplicate reporting	22	0.1%
Total Recovered	**15,845**	**100.0%**

Source: TEA PEIMS (1996-97)

A longitudinal rate may be calculated by dividing the number of students who drop out over several years, such as from 7th to 12th grade, by the number of students who entered school during the beginning year of the period under study. A true longitudinal rate can be calculated for the first time this year and exploration of this methodology is being conducted during the summer of 1997. An estimated longitudinal rate for Texas can be calculated by subtracting the annual rate as a percentage of 1.0 and raising the resulting retention rate to the sixth power. The retention rate is then subtracted from 1.0 for the final estimated longitudinal dropout rate.

State Dropout Rate

The total number of dropouts for the 1995-96 school year is 29,207. This represents a decline of over 700 students from school year 1994-95. The annual and longitudinal dropout rates are shown in Table 2 on page 6. The 1995-96 annual dropout rate is 1.8 percent, unchanged from 1994-95. The estimated longitudinal dropout rate is 10.1 percent.

The dropout rate among certain ethnic minorities has been and remains significantly higher than the overall dropout rate. The annual dropout rate of Hispanic students for the 1995-96 school year is 2.5 percent. African American students have a 2.3 percent annual dropout rate. Although the Hispanic rate has declined from 1994-95 while the African American rate has remained nearly constant, these groups continue to have the highest rates among all ethnic groups. All other student groups have a dropout rate that is lower than the state overall rate.

The estimated longitudinal dropout rates for Hispanic and African American students are also higher than other groups. The longitudinal rate for Hispanic students is 14.2 percent, while the rate for African American students is 13.1 percent. Achieving a longitudinal rate of five percent is still a significant challenge for these groups of students. Despite the high dropout rates, the total number of dropouts has actually declined for the Hispanic and White ethnic groups. The dropout rates by gender also are presented in Table 2. The male dropout rate of 1.9 percent is slightly higher than that for females (1.6 percent).

Table 2 also shows the dropout rates by grade for the 1995-96 school year. In 1995-96 the highest dropout rates were found in the 9th and 12th grades (2.7 percent and 2.6 percent, respectively). In 1994-95, the highest dropout rate also occurred at the

Table 2. 1995-96 Texas Dropout Rates by Ethnicity, Gender, and Grade Level

	7 - 12th Grade Enrollment	Total Dropouts	Percentage of Total Dropouts	Annual Dropout Rate	Estimated Longitudinal Rate
Ethnicity					
White	802,509	8,639	29.6%	1.1%	6.3%
African American	234,175	5,397	18.5%	2.3%	13.1%
Hispanic	580,041	14,649	50.1%	2.5%	14.2%
Other	45,853	522	1.8%	1.1%	6.6%
Gender					
Male	855,568	15,908	54.5%	1.9%	10.7%

9	360,691	9,733	33.3%	2.7%	15.1%
10	269,998	6,179	21.2%	2.3%	13.0%
11	220,209	5,150	17.6%	2.3%	13.2%
12	206,862	5,437	18.6%	2.6%	14.8%
Total	**1,662,578**	**29,207**	**100.0%**	**1.8%**	**10.1%**

Source: TEA PEIMS (1996-97)

9th grade level, with 2.8 percent; however, last year only 2.3 percent of 12th graders were dropouts. Table 3 presents dropout rates for each grade level by ethnicity. As Table 3 shows, the 9th grade dropout rate is highest among Hispanics and the 12th grade dropout rate is highest for African Americans. For Whites, the highest dropout rate is found in both the 11th and 12th grades.

Characteristics of Dropouts

Many factors have been shown to be related to students' dropping out of school. Basic demographic characteristics, family and personal background, a student's academic history, and characteristics of the student's school all may influence whether or not a student will stay in school. Texas dropout information by student characteristics is presented for the last three years in Tables 4 (on page 8) and 6 (on page 10), and ethnicity of dropouts for the last nine years is presented in Table 8 (see *Trends in State Dropout Rates* on page 13).

As Table 4 on page 8 indicates, the percentage of Grade 7-12 enrollment for students identified as economically disadvantaged increased slightly from 1994-95, while the percentage of total dropouts who are economically disadvantaged actually decreased. Not only did the dropout rate for economically disadvantaged students decrease from 1994-95, but this group's dropout rate dipped below the overall state rate.

Table 3. 1995-96 Texas Dropout Rates — Grade by Ethnicity

Grade	African American	Hispanic	Other	White
7	0.4% (186 / 42,776)	0.5% (574 / 110,416)	0.4% (33 / 7,883)	0.1% (186 / 143,858)
8	0.7% (275 / 41,573)	1.0% (1,081 / 107,827)	0.5% (43 / 7,833)	0.2% (330 / 142,652)
9	3.0% (1,643 / 54,009)	4.0% (5,584 / 138,999)	1.3% (110 / 8,742)	1.5% (2,396 / 158,941)
10	2.8% (1,062 / 37,965)	3.4% (3,041 / 90,223)	1.5% (119 / 7,794)	1.5% (1,957 / 134,016)
11	2.9% (853 / 29,220)	3.3% (2,230 / 68,167)	1.5% (101 / 6,879)	1.7% (1,966 / 115,943)
12	4.8% (1,378 / 28,632)	3.3% (2,139 / 64,409)	1.7% (116 / 6,722)	1.7% (1,804 / 107,099)

Source: TEA PEIMS (1994-95 – 1996-97)

School districts are required to identify students in Grades 7-12 as at risk of school failure or of dropping out (TEC §29.081). A student is defined as at risk if the student:

1. was not advanced from one grade level to the next for two or more school years;
2. is at least two years below grade level in reading or mathematics;
3. has failed at least two courses and is not expected to graduate within four years of ninth grade entrance;
4. has failed at least one section of the most recent Texas Assessment of Academic Skills (TAAS) exam; or
5. is pregnant or is a parent.

BEST COPY AVAILABLE

These indicators concentrate on a student's academic history and do not identify those students at risk due to family and personal background or school-related characteristics. As applied by school districts, the criteria result in 36.7 percent of students in Grades 7-12 in 1995-96 being identified as at risk. Yet, only 37.9 percent of 1995-96 dropouts was identified as at risk of dropping out during the year they dropped out of school, and the rate at which identified at-risk students drop out now more closely corresponds to the statewide annual rate than it has in the past. This is a decrease from the percentage identified in 1994-95. Of students who graduated in 1995-96, 28.4 percent was identified as at risk of dropping out.

Currently, an accurate measure of the academic achievement of dropouts is not available. However, information on the number of dropouts identified as overage for grade can be shown. One can generally assume that non-special education students who are not on the appropriate grade level for their age group have been retained in at least one grade before dropping out. In 1995-96, 80.3 percent of dropouts was overage for grade compared to 32.3 percent of all Grade 7-12 students. As Table 5 shows, the age level of dropouts for 1995-96 ranged from 10 to 21 years old as of September 1, 1995, with over 75 percent of the dropouts leaving at age 16 or older.

Table 6 on page 10 presents the number of dropouts receiving various educational services during the year they dropped out of school. As Table 6 shows, 12.3 percent of students enrolled in Grades 7-12 received special education services, but 14.7

Table 5. 1995-96 Texas Dropout Rates by Age

percent of dropouts received special education services in 1995-96. The percent of dropouts receiving special education services during the year they dropped out continues to increase each year.

To meet the unique needs of students with diverse linguistic, cultural, and educational backgrounds, programs for students with limited English proficiency (LEP) have been established. As indicated on Table 6, the percentage of dropouts in these programs decreased slightly from 1994-95, 7.9 percent in 1995-96 compared to 8.0 percent in 1994-95. The percentage of all students in bilingual/ESL programs remained about the same.

The National Center for Education Statistics (NCES) developed a standard national course classification system for elementary and secondary education (Bradby, Levesque, Henke, & Malitz, 1993). The structure of this system divides courses into academic courses and vocational education courses. In 1995-96, 29.2 percent of Texas dropouts were enrolled in vocational education courses the year they dropped out of school. Even though the percentage of all students enrolled in vocational education courses increased since 1994-95, the percentage of dropouts decreased.

Reasons for Dropping Out

The reason for leaving school, as identified by the district, was reported on 54 percent of all dropouts (see Table 7). Of the 15,870 students who had a reason listed for leaving school, 56.1 percent listed a school-related concern, such as poor attendance or failing grades; 11.8 percent listed a job-related concern, such as pursued a job or joined the military; 8.1 percent listed a family-related concern, such as pregnancy or marriage; and 24 percent listed other concerns, such as drug or alcohol abuse problems, homelessness, or enrollment in a non-state-approved alternative program. As Table 7 shows, 45 percent withdrew from school because of poor attendance. Although poor attendance was related to the student dropping out, it is not possible to determine what reasons were related to a student's poor attendance.

Districts were more likely to report job-related concerns for males than females. More than twice as many males than females were reported as leaving school to pursue a job. Females were more likely than males to leave for family-related concerns. About eight percent of females were reported as leaving school to get married, compared to less than two percent of males.

Table 7. Texas Top Ten Reasons for Leaving School, as Reported by School Districts for 1995-96

		Gender		Ethnicity			
Reasons for Dropping Out	**Total**	**Male**	**Female**	**African American**	**Hispanic**	**Other**	**White**
Poor attendance	**45.0%**	45.1%	44.9%	44.3%	41.4%	51.9%	50.1%
Enter alternative program, not pursuing diploma	**18.0%**	19.4%	16.2%	33.7%	14.9%	16.2%	12.9%
Pursue a job	**11.6%**	15.2%	7.0%	5.1%	13.2%	9.4%	13.2%
Low or failing grades	**5.8%**	6.4%	5.1%	2.6%	5.5%	4.3%	8.2%
Because of age	**4.7%**	5.1%	4.2%	5.5%	5.9%	7.2%	2.5%
To get married	**4.3%**	1.4%	8.0%	0.1%	7.1%	1.3%	3.1%

District Characteristics

Texas school districts differ greatly based on characteristics such as community type, district size, student performance, and expenditures. The dropout rates of schools among these categories differ as well. Appendix A includes a listing of dropout rates by district characteristics.

The dropout rates for school districts by community type are shown in Appendix A. Texas school districts are grouped into eight categories based on the type of community in which they are located. Factors such as proximity to a metropolitan area, size, and growth rate are used to determine the appropriate category for each district. (For a complete list of community types and their definitions refer to Appendix A). The highest dropout rates are found in school districts located in urban areas and central cities, the lowest in rural and nonmetropolitan fast growing areas. Texas student information shows that both minority students and economically disadvantaged students are found in greater numbers in the urban areas, and these students are already known to drop out of public schools at higher rates than their nonminority and wealthier peers.

Districts with the largest enrollments are also more concentrated in urban areas, again coinciding with higher dropout rates. Appendix A shows that districts with student enrollments over 50,000–all of whom are considered major urban districts–have a dropout rate of 2.4 percent. Districts with enrollments under 500 have the lowest dropout rate of 0.8 percent. The average dropout rate tends to decrease as district size decreases.

Appendix A also shows dropout rates among school districts based on student performance. Districts are grouped based on the percentage of students passing all Texas Assessment of Academic Skills (TAAS) tests taken. As the percentage of students passing all TAAS tests increases, the dropout rate decreases. The 207 districts with under 60.7 percent of their students passing all TAAS tests have a dropout rate of 2.4 percent, compared to 0.8 percent in districts with at least 79.1 percent of students passing the TAAS.

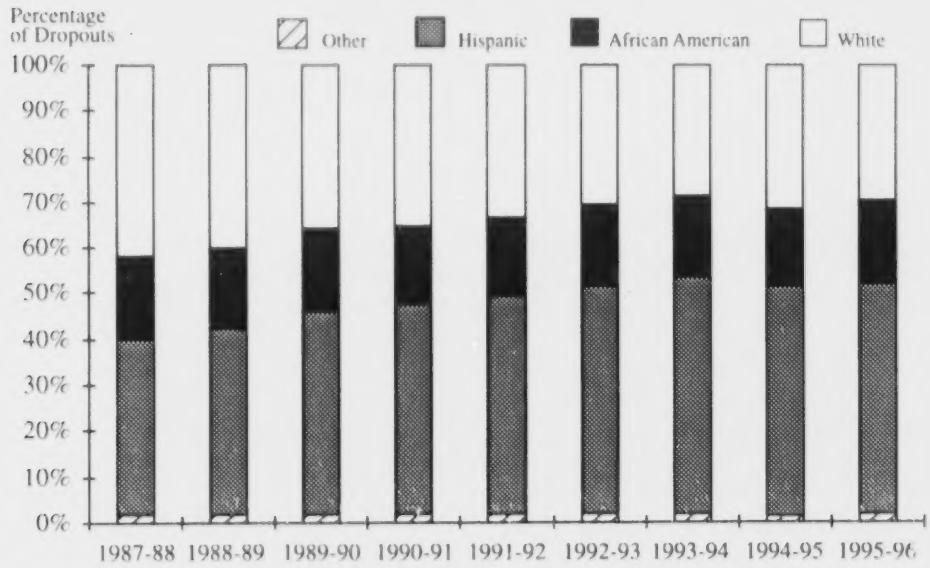
The resources of school districts and campuses have been considered a factor in the ability to supply needed support services for students at risk of dropping out of school. School districts with average and below average operating costs per pupil serve a large proportion of the state's total enrollment and generally a large percentage of the total dropouts. School districts with the highest operating costs per pupil have the lowest dropout rate of 1.0 percent. However, districts with the lowest operating costs have the next lowest rate of 1.4 percent.

Trends in State Dropout Rates

There has been a steady decline in the number of dropouts identified over the last eight years. The number of reported dropouts has declined by more than 68 percent since school year 1987-88 (see Table 8 on page 15). Improvements to school district student tracking systems contributed to the reduction in identified dropouts during the first few years of dropout data collection. The 1990-91 and 1992-93 reductions reflect, in part, enhancements to the statewide dropout recovery system. The significant decline in the number of dropouts reported in 1994-95 can be attributed to changes in the dropout definition, such as not including in the count seniors who fail exit-level TAAS but pass all other graduation requirements. Reduction is also attributed to use of the dropout rate as a performance indicator in the state accountability system. In 1995-96, the number of reported dropouts stabilized, as did the statewide annual rate, relative to results in 1994-95.

Minority students have represented a higher percentage of total dropouts than of enrollment since the 1987-88 school year. As Figure 1 shows, Hispanic students have made up the greatest percentage of dropouts since 1988-89. Overall, the percent of total dropouts who are minorities has increased slightly from 1994-95.

Figure 1. Texas Percentage of Total Dropouts by Ethnicity



Source: TEA PEIMS (1987-88 – 1996-97)

Figure 2 shows the percentage of dropouts by grade, from the 1987-88 school year to the 1995-96 school year. While students in the 9th grade consistently represent the highest percentage of total dropouts, students in the 12th grade are steadily increasing as a percentage of total dropouts. In 1987-88, students in the 12th grade represented almost 12 percent of all dropouts, while in 1995-96 they represented almost 19 percent, more than a 50 percent increase over the nine-year period. The greatest decline in number of dropouts occurred in the 10th and 11th grades, while the number of dropouts at Grades 7 and 8 have been stabilizing over the last 4 years.

Projected Cross-Sectional and Longitudinal Dropout Rates

Texas Education Code §39.182 requires calculation of projected cross-sectional and longitudinal dropout rates for grade levels 7-12 for the next five years, assuming no state action is taken to reduce the dropout rate. Projected dropout rates by grade level are calculated by applying the current year ethnic dropout rates to the population for each ethnic group within grade level as current grade levels are incremented for each projected year. That is, the first step in determining the 1996-97 rate is to represent all students who were in Grades 6-11 in 1995-96 as 7th-12th graders for 1996-97. The 1995-96 ethnic dropout rates are applied within each incremented grade level and then summed to yield the projected rates for 1996-97. For the next projected year, 1997-98, the same process is now applied to 5th-10th graders who have progressed to Grades 7-12. This method continues for each cohort through the year 2001-02 and is based on the assumption that current ethnic dropout rates will remain constant from year to year.

Table 9 shows the projected grade level (cross-sectional) and longitudinal dropout rates for Texas. Grade level dropout rates continue to reflect higher dropout rates in the 9th and 12th grades. The current longitudinal rate of 10.1 percent decreases slightly and remains fairly steady through the year 2000-01 before returning to the current rate in 2001-02.

An Update to the National Dropout Rate

NCES, with representatives from state and local education agencies and professional associations, developed a definition of "dropout" that could be adopted and implemented by all states. In 1992-93, NCES began collecting dropout data, under the new definition, through the Common Core of Data (CCD). The CCD is a standard set of data that NCES collects from every state annually. As of the 1992-93 school year, 17 states and the District of Columbia had data that met quality and comparability levels needed to justify publishing state estimates. Table 10 presents preliminary estimates of 1992-93 dropout rates, as reported by NCES (McMillen & Kaufman, 1996).

As indicated in Table 10, Texas has a national comparison dropout rate of 4.3 percent in 1992-93. This rate is higher than our reported state rate of 2.8 percent, primarily due to differences in the dropout definition and methodology used by NCES and the state of Texas. The state's methodology is more comprehensive in nature, likely reflecting availability of more data than other states have. For example, fall "snapshot" enrollment data are required for the NCES methodology, while Texas has the capacity to examine attendance over the course of the full school year. Such information cannot be accommodated by NCES because it would preclude comparability of the resulting dropout rates. It is worth noting that the

national comparison rate for Texas is lower than that for California (a state with similar demographics), and that Texas is seventh on this partial listing of 17 states.

National Annual Rates

NCES publishes national annual and longitudinal dropout rates based on survey data. The surveys provide a consistent picture of national and regional dropout rates over time. However, the rates are not consistent with those calculated for Texas and the surveys do not employ samples large enough to provide state-representative findings (Hoffman, 1995).

The national annual rates based on the Current Population Survey conducted by the U.S. Census Bureau are presented in Table 11 on page 18. Dropouts are defined as those 15- through 24-year-olds not currently enrolled in school, who were enrolled a year ago, and are not high school graduates. From these data, NCES estimates the total number of dropouts nationally for Grades 10-12.

As of October 1994, an estimated 5.3 percent of students in Grades 10-12 dropped out of school, representing almost one-half million students. Table 11 presents national dropout rates by ethnicity, gender, and age. The highest dropout rate is among Hispanic students and students aged 20-24 years old.

Table 11. National Dropout Rates for Grades 10-12 as of October 1994

	Total Dropouts (Thousands)	Percent of Total Dropouts	Annual Dropout Rate
White	274	55.1%	4.2%
African American	95	19.1%	6.6%
Hispanic	109	21.9%	10.0%

National Longitudinal Rates

With the National Education Longitudinal Study of 1988 (NELS:88), NCES began surveying eighth grade students. The survey follows the progress of these students as they continue on to postsecondary education or enter the labor force. The cohort of eighth graders in the survey was scheduled to graduate at the end of the 1991-92 school year. Following the 1988 base year data collection, these students were interviewed every two years through 1994. Based on information from interviews conducted in 1994, 89.0 percent of this cohort had completed a regular high school program by the summer of 1992, 2.5 percent completed an alternative credential, 0.1 percent received a certificate of attendance, and 5.5 percent was still enrolled in a high school program of some type.

Dropout Prevention Strategies

As Table 7 on page 11 shows, students drop out for many reasons and rarely is the decision to leave a snap judgment. The literature views dropping out from school as a process that begins with a student "withdrawing or disengaging" from school and then finally dropping out (Hahn, Danzberger, & Lefkowitz, 1987; Tomlinson, Frase, Fork, & Gonzalez, 1994). Sometimes this disengagement begins in the early grades (elementary or middle school) with the student finally dropping out in high school. To fully comprehend the dropout process, one would have to simultaneously examine the personal life of the student, the school and its local policies and practices, and the state and federal policies that shape the social and educational views of the nation.

Although it is difficult to determine the exact time a student decides to drop out of school, most prevention programs are implemented at the high school level. Even though not all dropouts are identified as at risk of dropping out — and in Texas fewer than 40 percent of all 1995-96 dropouts were identified that year as being at risk, using criteria set in law — the majority of dropout prevention efforts across the nation are aimed at students with certain attributes associated with "at risk" status (Hahn, Danzberger, and Lefkowitz, 1987; Tomlinson, Frase, Fork, & Gonzalez, 1994). These attributes commonly include (a) minority status, (b) low income status, (c) low academic achievement, and (d) pregnancy.

Prevention programs vary tremendously in populations being targeted for services, in the scope and kinds of services offered, and in the service delivery mechanisms used. Most of the literature concerning dropout prevention involves evaluations of specific programs to answer the question "Did this program work?" rather than "*Why* did this program work?" (O'Sullivan, 1990; Paredes, 1996; Wilkinson & Griffith, 1994; and Wilkinson & Mangino, 1994). However, examining successful programs described in the available literature permits identification of common strategies in keeping students from dropping out (Cardenas, Robledo, & Supik, 1986; Duckenfield, Hamby, & Smink, 1990; Hahn, Danzberger, & Lefkowitz, 1987; Ramirez, 1990). These strategies include:

* **Individualized instruction**: Individualized instruction in dropout prevention programs capitalizes on students' unique learning styles and interests and allows them to learn at their own pace and ability level.

* **Remediation and/or accelerated instruction**: Successful dropout prevention programs remediate students in basic academic skills and/or bring students up to grade level by the end of the program.

* **Mentorship and counseling**: One of the most effective strategies for a successful dropout prevention program is one-to-one involvement with a mentor. Mentors serve as role models by providing the necessary adult attention and support that will encourage the student to finish school and plan for the future.

* **Flexibility in programming and scheduling**: Dropout prevention programs serve a diverse population with diverse needs. Therefore, they are flexible about course sequences, course length, classroom structure, and class schedules.

* **Trained and committed staff**: Successful dropout prevention programs are staffed by individuals who are committed to at-risk teens and are dedicated to program plans and goals. Staff is also trained in tailoring instruction to meet individual student needs.

* **Parental involvement**: Successful dropout prevention programs have the support of the parent, both as a mentor and tutor for the child, and as a support to the teacher and school.

* **Collaboration from the community and businesses**: Successful dropout prevention programs collaborate with the community and local businesses. Developing company mentorship programs with at-risk students links the importance of graduation and future employment opportunities.

* **Serving the "whole" child**: Successful dropout prevention programs work with other governmental agencies to assure students' access to appropriate social services for their immediate needs, so that students in turn can concentrate on finishing school. These services can range from accessing employment-related benefits, to income assistance and day-care services for teenage parents.

Although these strategies show up repeatedly in successful dropout prevention programs, other programs have used additional strategies that have had a positive impact on the dropout rate in communities across the nation, with an apparent "key" being the match between students' needs and local school/community circumstances. Some of these include offering work study programs, implementing year-round schools, offering rewards or incentives, and providing transportation to the program. Other prevention strategies have targeted special groups, such as limited English proficient students, or have provided quality early childhood education, which helps better prepare children for school (Duckenfield, Hamby, & Smink, 1990; Vaznaugh, 1995).

Because dropping out of school can be such a complex process, influenced by a student's ethnicity, socioeconomic status, home life, and academic history, it is important that a school or district first assess the profile of their dropouts before establishing prevention or recovery programs.

Appendix A
TEXAS EDUCATION AGENCY
1995-96 ANALYZE CATEGORY DESCRIPTIONS

ENROLLMENT GROUPINGS
A nine-category grouping based on the total number of students enrolled by district as of the Public Education Information Management System (PEIMS) fall collection date (late October of each year). Enrollment excludes students who are served but not enrolled by districts.

DISTRICT TYPE
Classification of school districts based on factors such as size, growth rates, and proximity to urban areas as follows:

Major Urban. The state's eight largest metropolitan districts serving the Houston, Dallas, San Antonio, Fort Worth, Austin, and El Paso areas.

Major Suburban. Other districts in and around the major urban areas.

Other Central City. Major districts in other large Texas cities.

Other Central City Suburban. Other districts in and around the other large, but not major, Texas cities.

Independent Town. Largest districts in counties with populations of 25,000 to 100,000.

Non-Metro: Fast Growing. Districts not fitting in any of above categories but exhibiting a five year growth rate of at least 20 percent with at least 300 students enrolled.

Non-Metro: Stable. Districts not fitting any of above categories but with an enrollment exceeding the state median.

Rural. Districts not fitting any of above categories; districts either with an enrollment between 300 and the state median and a growth rate less than 20 percent, or with an enrollment less than 300.

PROPERTY WEALTH
Total taxable property value divided by enrollment, which indicates district ability to raise local funds on a per pupil basis. The property value used is total taxable value

BEST COPY AVAILABLE

for the last completed calendar year—i.e., 1995, as determined by the Comptroller's Property Tax Division (CPTD). Enrollment is for the 1995-96 school year. The first wealth grouping shows ten categories; the second simply shows districts above and below state average wealth; the third is a 20-category grouping with each category representing about five percent of the state's students. The six special statutory districts without taxable property wealth form a separate group in all three wealth groupings.

TOTAL TAX EFFORT

A four-category tax effort grouping of districts defined by the total effective tax rate, which was determined by dividing the last completed calendar year's total levy amount by that year's CPTD total taxable property value. The total effective rate is the sum of the school district maintenance and operations (M&O) rate, and the interest and sinking fund standardized rate. Rates are expressed per $100 of taxable value. The six special statutory districts without property tax levies appear separately.

MAINTENANCE AND OPERATIONS EFFECTIVE TAX RATES

A four-category tax effort grouping of districts showing the maintenance and operation (M&O) effective tax rate, which was determined by dividing the last completed calendar year's M&O levy amount by that year's CPTD total taxable property value. The M&O rate shown include the local standardized rate and money generated by districts for equalizing wealth. The six special statutory districts without property tax levies appear separately.

HIGHEST PROPERTY VALUE CATEGORY

A 13-category CPTD classification based on property use. These 13 are aggregated into four categories as follows:

Residential. Single-family, multi-family, and residential inventory.

Land. Vacant lots and rural real (taxable).

Oil and Gas. Oil, gas, and minerals.

Business. Commercial and industrial real, commercial and industrial personal, and utilities.

A district is placed into one of the four categories above that represents its greatest total property value. The six special statutory districts without taxable property wealth form a separate group.

SMALL/SPARSE ADJUSTMENT
A four-category grouping of districts based on the small/sparse adjustment amount as a percent of the total adjusted basic allotment amount. A fifth category contains all districts receiving no small/sparse adjustment. This percentage represents the extent to which state funding is adjusted to compensate for small and/or sparsely populated districts.

COST OF EDUCATION INDEX LEVEL
A five-category grouping of districts based on the Cost of Education Index (CEI) level. It reflects geographic variations in costs and prices outside district control.

OPERATING COST PER STUDENT
A five-category grouping of districts based on operating cost per student. Operating costs are the sum of all expenditures budgeted for the operation of the district for all funds. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services expenditures. Per student amounts are the school year expenditures divided by enrollment. The source for budgeted expenditures is the fall PEIMS submission.

EDUCATION SERVICE CENTER REGION
The state is divided into 20 geographic regions; districts within each region are served by an Education Service Center.

TAAS: PERCENT PASSING ALL TESTS TAKEN
A five-category grouping of districts based on the percent passing the Texas Assessment of Academic Skills (TAAS). For Grades 3-8 and 10, the total number of students passing all sections taken of the TAAS is expressed as a percentage of the total number of students taking one or more tests. This percentage excludes special education students and third graders taking the test in Spanish.

SAT I/ACT: PERCENT TAKING
A three-category grouping based on the percent of 1994-95 graduates taking the SAT I and/or the ACT Assessment. A fourth category is reserved for districts that had no graduates.

SAT I/ACT: PERCENT SCORING ABOVE CRITERION
A five-category grouping based on the percent of 1994-95 graduates who scored at or above the criterion (1000 on the SAT I Total and/or 24 on the ACT Composite) on the SAT I and/or ACT. The number of examinees meeting the criterion is divided by the number of graduates. A sixth category is reserved for districts that had no graduates.

STUDENT DENSITY
A four-category grouping based on density, or the number of students enrolled per square mile. District square miles were determined through a joint effort by the State Property Tax Board (SPTB), the Texas Education Agency, and the Texas Water Commission. Maps provided by districts to the SPTB were digitized by the Water Commission to determine acreage. The six special statutory districts without available mileage information form a separate group.

ENROLLMENT CHANGE FROM PRIOR YEAR
A five-category grouping based on the growth or decline in district student population over a one year period. Districts with declining enrollment represent one category, while remaining categories show one-year growth rates ranging from "0%-3%" to "10% and over."

PERCENT AFRICAN AMERICAN, HISPANIC, AND MINORITY STUDENTS
Three six-category sets of groupings according to the ethnic composition of district student populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white populations expressed as a percentage of the total. Non-white populations include Native American or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic.

PERCENT ECONOMICALLY DISADVANTAGED STUDENTS
A six-category grouping according to the district percentage of enrolled students classified as economically disadvantaged on PEIMS as follows:

a) Eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
b) From a family with annual income at/below the federal poverty line;
c) Eligible for AFDC or other public assistance;
d) Recipient of Pell Grant or comparable state need-based financial assistance program; or
e) Eligible for programs assisted under Title II of the Job Training Partnership Act.

AVERAGE TEACHER EXPERIENCE
A four-category grouping of average teacher experience years computed as total professional experience years for all district teachers divided by total teacher full-time-equivalent (FTE) count.

AVERAGE TEACHER SALARY
A four-category grouping by average district teacher salary computed as the total salary of teachers divided by the total teacher FTE count. Total salary amount does not include career ladder or any other supplement.

PERCENT MINORITY TEACHERS
A six-category grouping according to the minority composition of district teaching populations. Minority percent is calculated by summing all non-white teacher FTEs and dividing by the total teacher FTEs.

PERCENT OF TEACHERS WITH ADVANCED DEGREES
A four-category grouping by district percentage of teachers with advanced degrees computed as the FTE count of teachers with a master's or doctoral degree divided by the total teacher FTE count.

COMPLIANCE STATEMENT

TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

(1) acceptance policies on student transfers from other school districts;

(2) operation of school bus routes or runs on a nonsegregated basis;

(3) nondiscrimination in extracurricular activities and the use of school facilities;

(4) nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;

(5) enrollment and assignment of students without discrimination on the basis of race, color, or national origin;

(6) nondiscriminatory practices relating to the use of a student's first language; and

(7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

TITLE VII, CIVIL RIGHTS ACT OF 1964 AS AMENDED BY THE EQUAL EMPLOYMENT OPPORTUNITY ACT OF 1972; EXECUTIVE ORDERS 11246 AND 11375; EQUAL PAY ACT OF 1964; TITLE IX, EDUCATION AMENDMENTS; REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED; IMMIGRATION REFORM AND CONTROL ACT OF 1986; AMERICANS WITH DISABILITIES ACT OF 1990; AND THE CIVIL RIGHTS ACT OF 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Employment Opportunity/Affirmative Action employer.
